

### From Months of Manual Effort to Days of Automated Certainty

The complexity of Medicaid claims processing makes testing a notorious bottleneck. **NalaN** transforms your validation process from a resource-draining marathon into a streamlined, high-speed sprint with intelligent automation.

Snovation is dedicated to optimizing healthcare operations with our expanded suite of services featuring NalaN, an advanced AI/ML-powered platform. NalaN enables Medicaid agencies, MMIS vendors, and managed care organizations to accelerate implementation timelines, reduce operational costs, and improve accuracy in claims pricing and policy validation.

### Key Benefits:

**Up to 30% Cost Savings** in the first year through automation and data-driven AI/ML Model improvements.

**Rapid Deployment** tailored to your Medicaid program's unique business rules.

**Automated UAT** reduces manual effort and accelerates go-live timelines.

**Enhanced Accuracy** with production-compliant synthetic test data generation.

**Scalable** to meet high-volume claims processing for performance and stress testing.

**Automates repetitive tasks**  
Streamlines routine operations to save time and reduce manual effort.

**Rapidly adapts to new policies**  
Quickly incorporates changes in procedures or regulations with minimal disruption.

**Delivers gradual, sustained cost reduction**  
These combined capabilities lead to consistent financial savings over time.

### Unique Advantage:

Configured on client-specific data in weeks—addressing the complexity where off-the-shelf products fail to adapt.

Core NalaN Modules: A comprehensive suite for end-to-end testing and validation.

**Claims Calculators**  
Accurately compute reimbursement based on state-specific rules.

**End-to-End Automation**  
Automates submission, adjudication, and results validation.

**Synthetic Data Generation**  
Generates production-compliant, de-identified test data.

**Policy & Edit Validation**  
Validates business rules and logic as per Medicaid specifications.

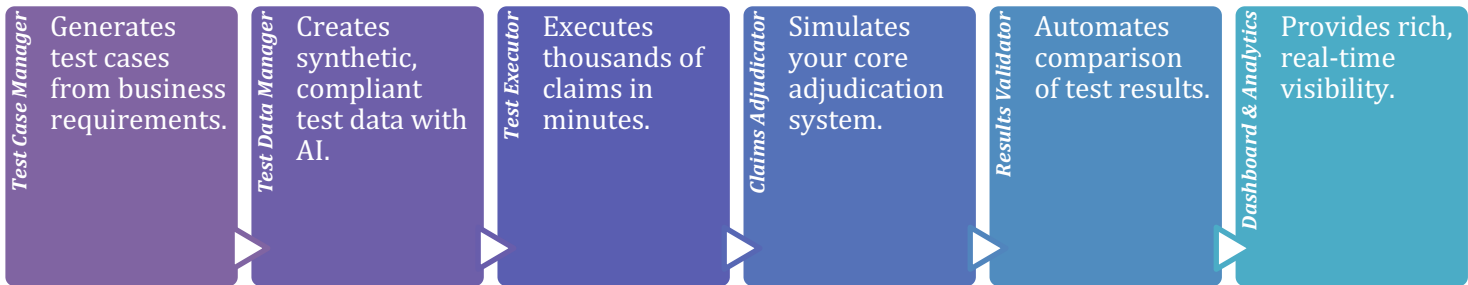

**Audit & Regression Testing**  
Supports audit-level verification and regression test suites.

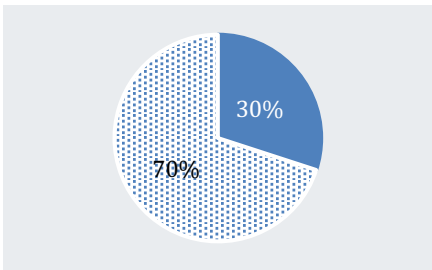

**Interactive Chatbot**  
Natural language interface to query results, run tests, and access reports.

How NalaN Works

The NalaN Transformation: Drastically reduce testing cycles and manual overhead.

Annual operational testing and validation costs reduced by approximately 30%.
